Import filters and viewing for

- PDF, Visio, Publisher and many more

Powerful WYSIWYG rendering

On-premise integration

Architecture – a bet on CPU threads and network

Collaborative Writer

The screenshot displays a web-based collaborative writing application interface. At the top, there is a navigation menu with options: File, Home, Insert, Layout, References, Review, Format, Form, View, and Help. The document title is "Sailing Yacht.odt". Below the menu is a rich text editor toolbar with various icons for text formatting (bold, italic, underline, strikethrough, text color, background color), alignment, and list creation. The main editing area shows a document with the following content:

Sailing yacht

A **sailing yacht** (US ship prefixes SY or S/Y), is a leisure craft that uses sails as its primary means of propulsion. A **yacht** may be a sail or power vessel used for pleasure, cruising, or racing.[1][2][3] There is no standard definition, so the term applies here to sailing vessels that have a cabin with amenities that accommodate overnight use. To be termed a "yacht", as opposed to a "boat", such a vessel is likely to be at least 33 feet (10 m) in length and have been judged to have good aesthetic qualities.[4] **Sailboats** that do not accommodate overnight use or are smaller than 30 feet (9.1 m) are not universally called yachts. Sailing yachts in excess of 130 feet (40 m) are generally considered to be **superyachts**.^[5]

Sailing **yachts** are actively used in sport and are among categories recognized by the governing body of sailing sports, [World Sailing](#).^[6]

Etymology

Sailing yachts are actively used in sport and are among categories recognized by the governing body of sailing sports, World Sailing.^[6]

The term, *yacht*, originates from the [Dutch](#) word *yacht* (pl. *jachten*, which means "hunt"), and originally referred to light, fast sailing vessels that the [Dutch Republic](#) navy used to pursue [pirates](#) and other transgressors around and into the shallow waters of the [Low Countries](#).^[7]

History

The history of pleasure boats begins with rowed craft in Pharaonic Egyptian times. The history of sailing yachts begins in Europe in the beginning of the 1600s with the building of a pleasure vessel for the son of [King James I of England](#). Pleasure vessels acquired the name *yacht* after the time of [Charles II](#), who spent time exiled in Europe and visited the Netherlands, where a variety of *jachten* were already well developed as pleasure boats for the elite classes since the beginning of the 17th century. Upon his restoration to the English crown, Charles commissioned a series of small yachts, which included at least one experimental https://en.wikipedia.org/wiki/Charles_II_of_England between two vessels occurred in 1661, followed by the first open sailing competition in 1663 in English waters.^[8]

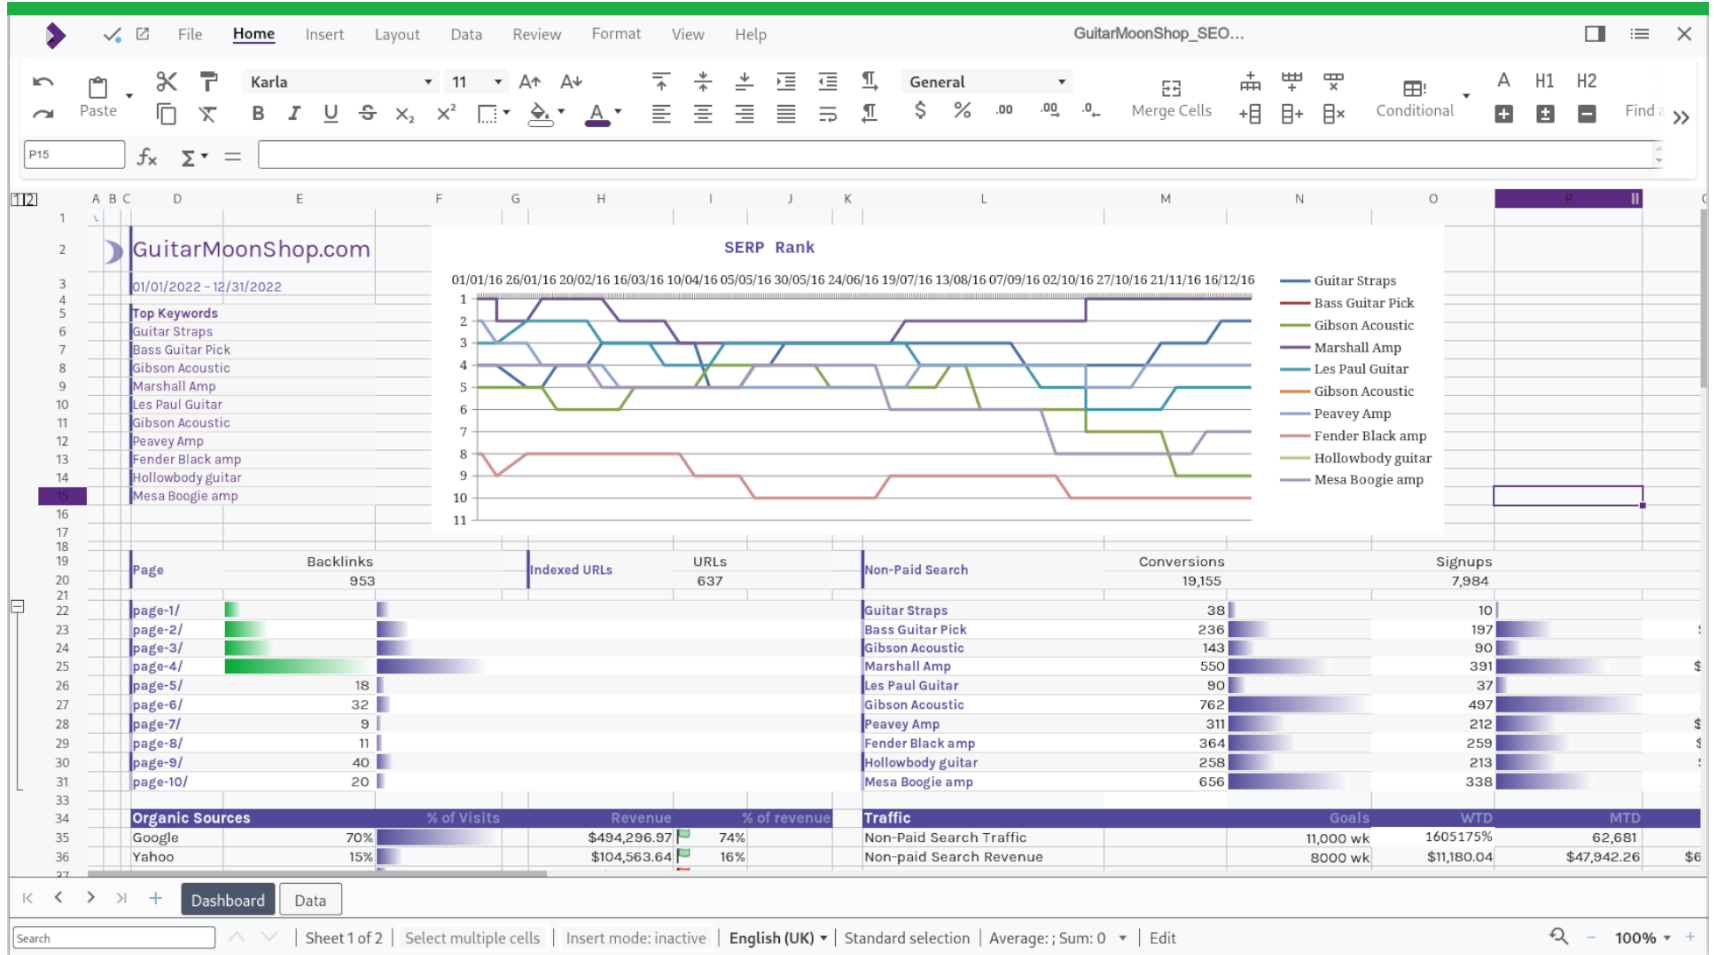

There are two images of sailing yachts: one showing a three-masted vessel with white sails on a blue sea, and another showing a smaller, more modern-looking yacht with a white hull and blue accents on the water.

On the right side of the editor, there is a sidebar with a table of contents or navigation menu:

- Headings
 - Sailing yacht
 - Etymology
 - History
 - Evolution of design
 - Cruising yachts
 - Racing yachts
 - Source and photo's

Collabora Online

Why the Collabora Online Subscription?

Focused on providing high quality software, thoroughly tested and ready for business

Collabora Online is a powerful online office suite, which you can integrate into your own infrastructure. We take digital sovereignty seriously and provide you with all the tools to keep your data secure, without compromising on features. With our supported subscription you get:

- Assured Digital Sovereignty & Security**
 - On-premise / self hosted - control your data, app & network
 - No ties to any storage or authentication system
 - Documents are not broadcasted to all clients, but shared as pixels
 - Each document session gets its own private jail - with no local copy between document editing sessions
 - Simple integration based on a WOPI API providing storage & authentication
- No Limitations for Your Productivity**
 - All code is Open Source
 - Full featured, rapid improvement
 - Available for all major PC and mobile platforms
 - Flexible - many different integrations into 3rd party solutions
 - Excellent interoperability with DOCX, XLSX, PPTX and other Microsoft files
- A Cost Effective & Flexible Plan**
 - Simple pricing plan
 - High Availability as standard

Product Management Relationship

Collaborative Presentations

The screenshot shows the Collabora Online presentation editor interface. At the top is a menu bar with options like File, Home, Insert, Layout, Review, Format, View, and Help. Below the menu is a toolbar with various editing tools such as Paste, Bold, Italic, Underline, Text color, Background color, Bullets, Numbering, Indentation, Text Box, Connectors, Image, and Presentation. The main workspace displays a presentation slide with a purple background and white text that reads "Collabora Productivity Powerful Online Collaboration on Your Own Terms". To the right of the slide, a stack of overlapping document pages is shown, with red and green lines indicating editing by "THOMAS" and "ANNE" respectively. On the left side, a slide thumbnail pane shows a list of slides. On the right side, a slide properties panel is visible, showing settings for Format (Screen 16:9), Orientation (Landscape), Background (None), Master Slide (Title_or_Ending), and checkboxes for Master Background and Master Objects. Below this, a layout selection panel shows various slide layout templates.

Collabora for Android and iOS

Collabora Office for tablet and mobile

- Supported and enterprise-ready – part of our Collabora Office subscription
- Fully open source
- Native integration in Android and iOS user interface
- Privacy by default – no external storage needed
- Excellent interoperability with Microsoft Office

Full Online Office Functionality

Most mature Office code-base outside Microsoft

- Based on LibreOffice Technology from the world's most widely used Open Source office suite

Leading developer of online office capabilities

- Full-featured, rapid improvement, fully Open Source

Available on all major platforms and many different integrations

- No compromises; flexible – lots of different integrations available
- On-premise / hosted – control your data, app and network

Assured Digital Sovereignty & Security

Digital Sovereignty

- **You control** where your data is stored
- On premise or with known provider
- **Not tied** to any storage or authentication system

Digital Security

- Documents are **not shared** – just the pixels
 - enforce policy on the server – not in the JS client...
- Integration based on an **extended subset**; “WOPI-like”
- Each document gets its **own private jail** and a document is **only stored locally** during its own editing session

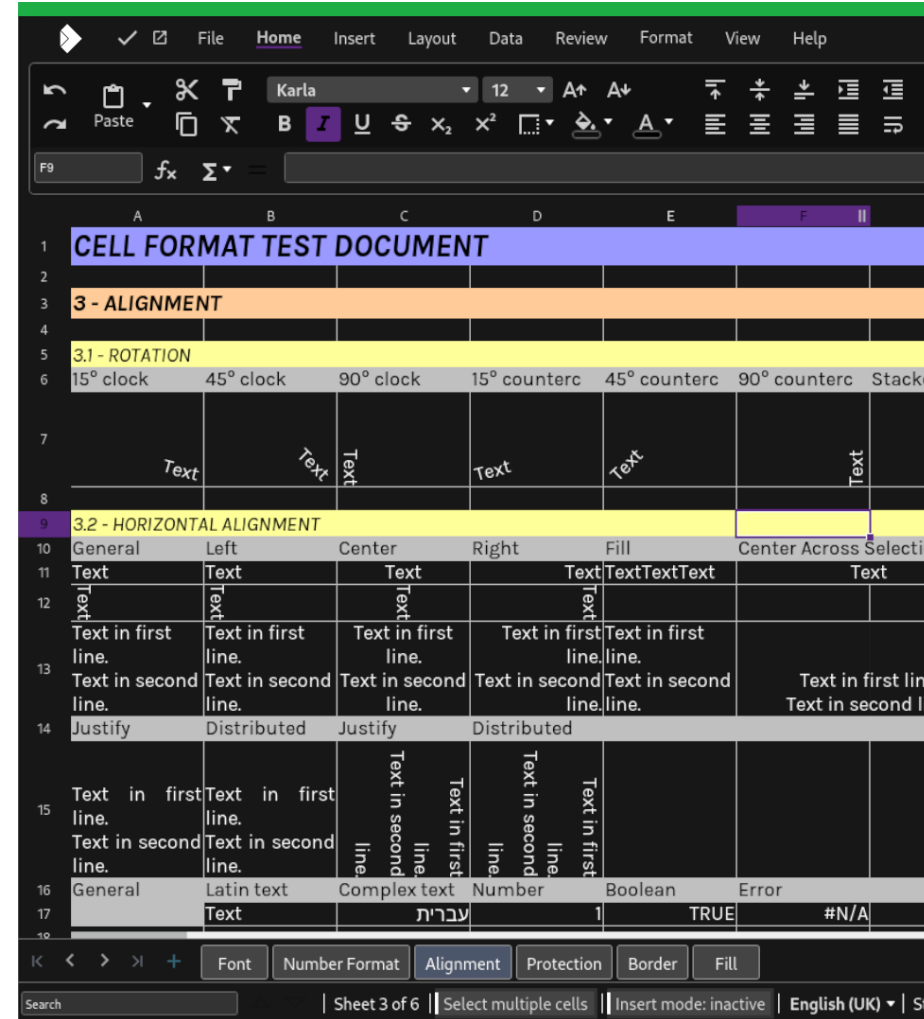

Recent Features

Accessibility

Accessibility

Dark mode + view settings

- Per view settings, allows us to render views differently – including various options such as showing non-printing characters or spell checking underlines in different views, in addition to Dark Mode.

Accessibility

Keyboard accelerators

- Expansion for languages
 - Keyboard shortcuts have been expanded to allow all users to be able to use their own language's keyboard shortcuts when editing a file collaboratively.
 - Holding down the 'Alt' key will also highlight options for learnability.

Vehicle

For the Exact Sales Amount indicated below, Vehicle described below to the Buyer, acknowledge authority to sell it, warrant the Vehicle to be free from defects, and warrant that the information given is true and correct to the best of the Seller's knowledge.

Performance

Performance

A faster, slicker experience

- Memory trimming on idle: cleans caches & frees up memory
- Swap out compressed image data as well as uncompressed
- Faster load of large spreadsheets
- Significantly reduced re-rendering (even more pending)
- Style re-thumbnailing redux
- Improved tile pre-loading (with more caching work queued)
- Clamp over-sizing of threads
- Accelerated transparent text rendering
- Avoid background whole document renders
- RLE tile encoding (pending)

Performance

Memory optimization

- Less memory; used effectively
- Run-length encoding delta cache makes it far smaller and faster to use. Compressed image data swapping to reduce footprint. Trimming caches & allocators on idle. Larger compressed browser-side tile cache. Monotonic timestamp cache synchronization & expiry.

CPU optimization

- Saving power, and going faster.
- Reduced invalidation & re-rendering. Improved user prediction & pre-loading for better latency. Accelerated style previewing & thumbnailing. Optimized pixel manipulation & un-pre-multiplication. Accelerated scrolling & Javascript rendering.

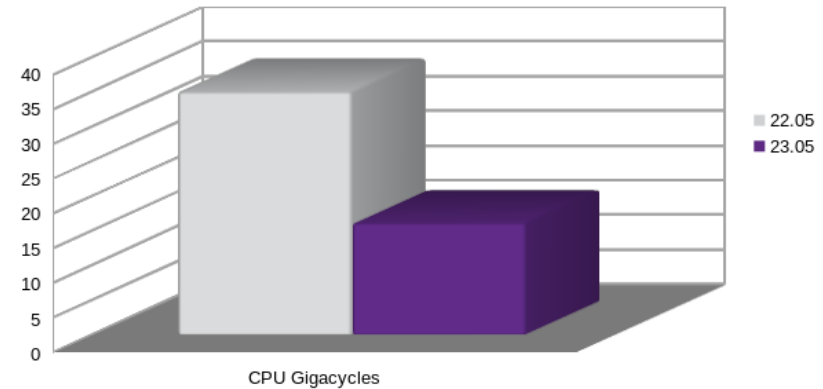

Performance

Performance tuning

- Much faster for many operations
 - for example – multiple users to join a shared Writer document and scroll through a long, heavy Writer document.
- Improved threading of tile compression
- AVX2 optimized RLE compression
- Long term profiling of demo servers & targetted optimization ...

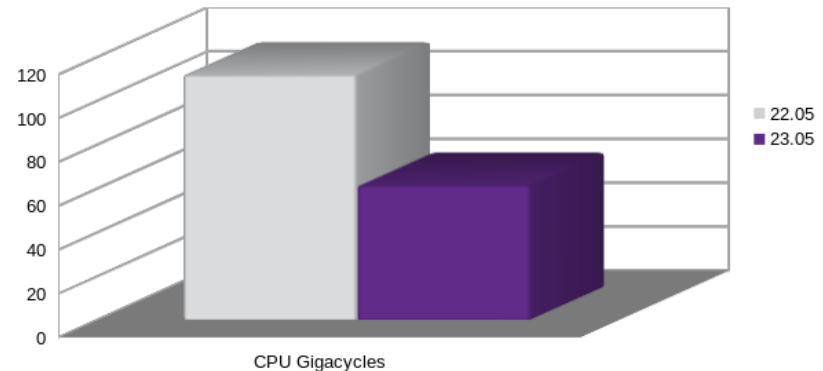

Joining Writer Shared Document

Writer document with 5 pages. 20 users joining simultaneously, until all clients rendered. perf stat -e cycles

Writer Scrolling

Writer document with 157 pages, 164 shapes, 32 comments, 13 images, 115 tables. Wheel scrolled from start to end. perf stat -e cycles

Smaller is better!

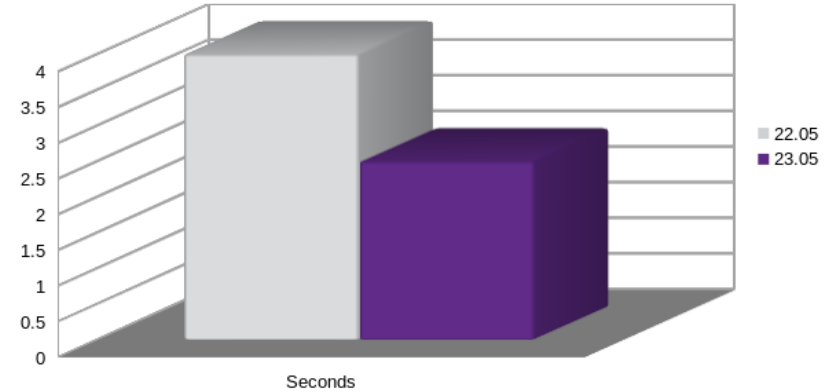

Performance

Performance tuning

- Reduced time to load graphic heavy Impress slide decks, and comment heavy Calc spreadsheets.

Impress Full Screen Presentation Generation

60 graphics heavy slides. Wall clock time.

Calc XLSX Comments Load

1000 Rows, 30 Columns, 2500 Comments. Wall clock time.

Recent Features

Interoperability

Interoperability

Multi-stop gradients - improved rendering

- The renderer has been enhanced and can now handle even more complex gradients. You can now turn up the visual appeal of your document by incorporating multi-stop gradients into shapes, borders, and other elements.

Interoperability

64 bit Zip support – handling huge data sets

- The Zip64 standard extends numerous internal limitations in the XLSX and ODS formats used to compress documents. Editing and working with huge spreadsheets is now possible.

Interoperability

Compact Pivot Tables for Calc Spreadsheets

- Preserve the compact view and layout of Pivot Tables created in Excel with a more compact layout avoiding the possibility of incorrect cell references.

Easy Barcode and QR code input

- Bringing the existing LibreOffice technology's QR code functionality to your browser:
 - *Thanks to Shubham Goyal and Google Summer of Code*

Usability

Page number insertion – familiar, simplified pop up

- Combining inserting the required headers, footers, and page number fields into a single, easy to use, familiar dialog for users.
- Featuring all the common alignment options, support for a variety of languages, and a preview.

students study for the same course regardless of which college they attend.[2] For postgraduate students, research is conducted centrally in the faculties, departments and other university-affiliated research centres, though the colleges provide a central social and intellectual hub for students.

Facilities

Colleges provide a range of facilities and services including catering, library facilities, extracurricular life at Cambridge is centred around college. Student activity is typically organised through postgraduate students. Another important element is the frequency from weekly to every night of the week.

Colleges also provide funding, accommodation, or both, for some of the academic posts in university, with the majority of Cambridge academics being a fellow of a college in addition to their faculty/departmental role.[3] Fellows may therefore hold college positions in addition to
